Mr. Neal Andrews

bi02 Cosmeceuticals

1504 Rutgers Place
Harbor City CA 90710

Dear Neal:

Here is my testimonial. I have used the Aminoplex spray in the office on various patients especially a diabetic charcot wound patient and others and have found the healing has been greatly enhanced with less pain for the patients and increase in granulation tissue. The product speeds the healing process so much so, that I have seen a severe house call patient with bone through the ankle joint and laterally along the fifth metatarsal area and both, I repeat both areas have healed over completely with granulation tissue and good skin to closure. I highly endorse this product along with good wound debridement and infection control as a new adjunctive treatment modality to speed healing of diabetic wounds even when circulation is compromised.

Sincerely,

A handwritten signature in black ink that reads "Honor G. Manilla DPM". The signature is written in a cursive style with some capital letters.

Honor G. Manilla, DPM
